TI Oral compositions containing carotenoids and tocopherols for preservation  
of skin color after suntanning

	KIND	DATE	APPLICATION NO.	DATE
PI	FR 2722094	A1	19960112	FR 1994-8301
IN	FR 2722094	B1	19970711	19940705
SO	Blime, Jean Claude Fr. Demande, 8 pp. CODEN: FRXXBL			

AB Oral compns. contg. carotenoids and tocopherols for preservation of skin  
color after suntanning and reactivation of skin pigmentation after  
irradn. with UV is claimed. A capsule contained  $\beta$ -carotene 10,  
vitamin E 5, borage oil 100, hydrogenated soya oil 53.207, and soya  
lecithin 33.33 mg. The efficacy of the above capsules in prolongation of  
the skin pigmentation of volunteers after irradn. with UV is shown.
